Greeting from GFS Group!

I am working as a Director, handling portfolios like HR, Administration and Finance department of our GFS Group of companies under the banner of **GURUTECH FIRE SYSTEMS PRIVATE LIMITED**. All three companies have their individual Board of Directors. My responsibilities for my group of companies are very vital because the portfolios which I am handling is considered the backbone of an organisation so it is very important for me that I should have a very clear vision for providing very clear roles and responsibilities to my subordinate employees who are responsible for obtaining the key results.

I am very determined about carrying out our daily missions and have a very clear goal that at the end our client should be satisfied with our services. This helps the company to have a repeat client base. As an administrator, sometimes I need to be very strict about my company policies, rules and regulations to maintain discipline among my subordinates. I make sure that each and every person working under me should be accountable for what he/she is doing.

We have done massive projects, received many awards and recognitions, been complimented by industry big tycoons etc. This all recognition which my company and I have gained is the result of hard work and dedication of our entire team.

I am very passionate about my work which I do. I work tirelessly to fulfil and achieve my targets. We provide best customer service that keeps our existing customers loyal to our business. A lot of business challenges came my way. But I cross those challenges with zeal and hard work. Perseverance is most important thing to meet the big challenges. Remaining calm and positive helps in analysing the situation and finding solutions.

I am always looking forward to challenge myself with enthusiasm. My passion inspires me and everyone around me.

For me professional success is framed on three key elements: clarity of purpose, growth, mindset and courage. Without purpose it is hard to have a clear direction; it is important to know what you want and what you are striving for. I feel that aligning the company's vision and values with my own is one way to achieve professional success.

YASH AMBOLE
Director

Warm Regards,
Yash Ambole
Director

Gurutech® Fire Systems Pvt Ltd

About us

In the year 2010, a dream took shape—a dream to protect, to secure, and to ensure that no fire ever takes away what matters the most— LIVES & ASSETS. This dream became a reality with the birth of **Gurutech® Fire Systems Pvt Ltd.**

Every fire alarm we install, every fire extinguisher we refill, and every Fire Fighting & Sprinkler System we set up is more than just a service; it's our commitment to safety. We understand that fire doesn't just destroy buildings; it takes away dreams, memories, and lives. That's why we dedicate ourselves to ensuring that no one is ever unprepared.

From securing PMC PCMC & PMRDA Fire N.O.C. for businesses to supplying Fire Hydrant Equipment, Smoke Detection Systems, and Alarm Systems, we are not just providers; we are guardians of safety. Our AMC contracts ensure that fire protection systems remain in top-notch condition, ready to respond when needed the most.

Gurutech[®] **Fire Systems Pvt Ltd** **Your Trusted Fire Safety** **Partner, Protection,** **Perfected.**

Gurutech[®] Fire System Pvt.Ltd delivers end-to-end fire safety solutions designed to safeguard lives and assets with absolute reliability. Leveraging a decade of specialized experience, we are the definitive choice for businesses seeking advanced fire protection that guarantees both full compliance and unwavering safety

Our Core Solutions

We specialize in securing your environment through a comprehensive approach :

Installation : Expert setup of advanced, reliable fire suppression and detection technologies.

Maintenance & Servicing : Proactive inspection and maintenance to ensure peak system performance and regulatory compliance.

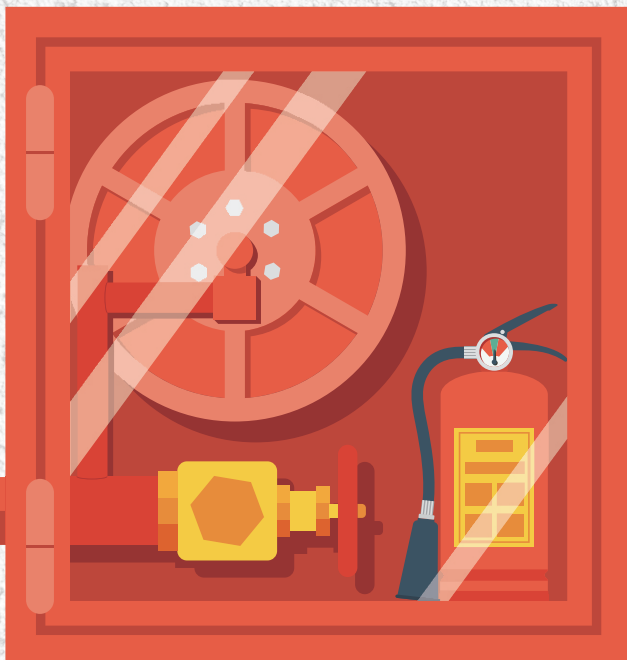

Supply : Providing top-tier, certified fire safety equipment and components.

Our **Vision**

Earning the trust of every sector by setting the industry standard for comprehensive fire safety solutions in residential, commercial, and industrial environments

Our **Mission**

Empowering every client with the knowledge to prevent fires, and ensuring all safety systems are trusted, reliable, and perfectly ready for any critical moment

Gurutech® Fire Systems Pvt Ltd

**BE SAFE,
PROTECT
EVERY
MOMENT**

Founded in 2010, Gurutech® Fire System rapidly established its authority. we secured the Authorized Fire License of Maharashtra State, formally confirming our expertise and strict adherence to safety codes. Partner with us for fully legal, expert, and uncompromising fire protection across Maharashtra.

Gurutech® Fire System proudly became a Private Limited Company in 2024. This transition strengthens our corporate governance, financial stability, and operational scalability. As a result, we are now better structured to manage larger projects and continue investing in the cutting-edge fire safety technology that serves our clients.

2010

2024

2014

State Certified in 2014. Our official Maharashtra Fire License validates our expertise and commitment to full compliance, ensuring you receive only legally sound, state-authorized fire safety solutions.

What we Offer

Fire fighting and sprinkler systems are essential components of modern fire protection. They play a vital role in preventing hazards and minimizing damage during an emergency.

Landing Valve a type of valve used in fire safety systems to control the flow of water. It is typically found in buildings as part of a wet riser system where it is located on a staircase landing to provide easy access for firefighters to connect a hose and fight a fire

Fire alarm and smoke detection systems are crucial for early warning and quick emergency response. At Gurutech Fire Systems Pvt Ltd, we offer certified, high-performance alarm and siren solutions designed to protect lives, property, and ensure total fire safety.

Fire extinguishers are the first line of defense in any fire emergency. At Gurutech Fire Systems Pvt Ltd, we offer certified extinguishers with professional refilling and maintenance to ensure constant safety readiness.

Regular maintenance keeps your fire safety systems ready for any emergency. At Gurutech Fire Systems Pvt Ltd, we offer AMC services for hydrants and extinguishers to ensure reliable performance all year round.

Fire N.O.C from PCMC, PMC & PMRDA is mandatory for all commercial, industrial, and residential establishments. It verifies that your building meets fire safety standards, ensuring legal compliance, enhanced protection, and readiness against fire hazards.

What we Offer

Branch pipe and nozzle is a piece of firefighting equipment, also called a pipe nozzle, used to direct water or other fire retardants from a hose with control and accuracy.

Fire hydrant systems are the backbone of fire safety. At Gurutech Fire Systems Pvt Ltd, we deliver top-quality, certified hydrant equipment built for reliability, quick response, and complete compliance with safety standards.

First aid hose reel is a fixed firefighting equipment, consisting of a revolving drum with a length of hose, connected to a water supply, used for fighting incipient stage fires.

Fire hose box is a wall-mounted cabinet used to store and protect fire hoses and related equipment like nozzles and fire extinguishers. These typically red, durable enclosures are designed for quick access during a fire emergency.

Manual call points (MCPs) are devices, typically red, that manually trigger a fire alarm system when activated by a person. They are used in conjunction with automatic detectors like smoke and heat sensors to provide a quick way to raise an alarm.

Electronic hooter fire is an audio alarm component of a fire alarm system that produces a loud, distinctive sound to alert people to a fire. It is triggered by a fire alarm control panel, which receives a signal from a smoke detector or other sensor.

Our Expert Solutions & Services

Fire Extinguisher Supply & Service

Supply of new, ISI-marked extinguishers (all types : CO2 , ABC, Foam, etc.) and professional refilling, recharging, and annual maintenance (AMC)
